

Post-Treatment Instructions

Arestin

First Week After Treatment:

- Do not touch the sites treated with Arestin
- Do not chew hard, crunchy, or sticky foods (such as carrots, taffy, or gum)

For 10 Days After Treatment:

- Do not floss or use other tools to clean between the treated teeth
- Mild-to-moderate sensitivity is normal
- Call the office right away if you have severe pain or signs of allergic reaction (such as itching or swelling)

Keep Up With Treatment:

- Scheduling and keeping follow-up visits can help maintain control of periodontal disease
