

Post-Treatment Instructions Lab Hard Relines

- The laboratory has added acrylic to the inside of your partial/denture to give you a more snug fit.
- It is common to feel a pressure point or two which irritate the gums.
- Take the partial/denture out and rinse your mouth with warm salt water.
- After it heals, reinsert the partial/denture.
- If pressure point reappears, call the office for an appointment to have it adjusted.
- Clean as directed for your partial/denture.
